

**XALDIGITAL**

Empowering Data

# TRANSFORMING ECOSYSTEMS WITH ADVANCED SOLUTIONS

Driving new business opportunities.

XD

# WHAT MAKES US UNIQUE

We began as **experts in Big Data**, grounding our passion for technology.

We drive **digital transformation for businesses** through **advanced technology and customized solutions to maximize their potential**.

## OUR OBJECTIVE?

Transform each challenge into an opportunity, utilizing cutting-edge technology to deliver results that impact business.

## CUTTING-EDGE TECHNOLOGY

We implement cutting-edge tools such as IoT, Generative Artificial Intelligence and Machine Learning.

## CUSTOMIZED SOLUTIONS

Each project is adapted to the specific needs and objectives of our clients.

## DATA-DRIVEN DECISIONS

We help companies transform data into actionable strategies with Data Analytics.

## CONTINUOUS SUPPORT

We guarantee the operability and scalability of implemented solutions.

# GROWTH AND EXPANSION

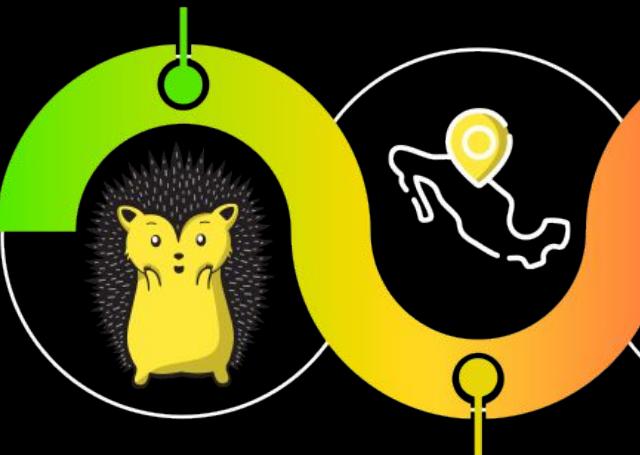

We have completed **more than 300** projects, collaborating with more than **55 clients** in more than **25 countries**.

Our team of more than **200 XalXperts** are highly trained professionals with experience in diverse industries, which allows us to offer personalized and efficient solutions.

# OUR JOURNEY

Founded in  
2017

Headquarters in  
Mexico

Offices in **Spain, Guatemala, USA & Colombia**

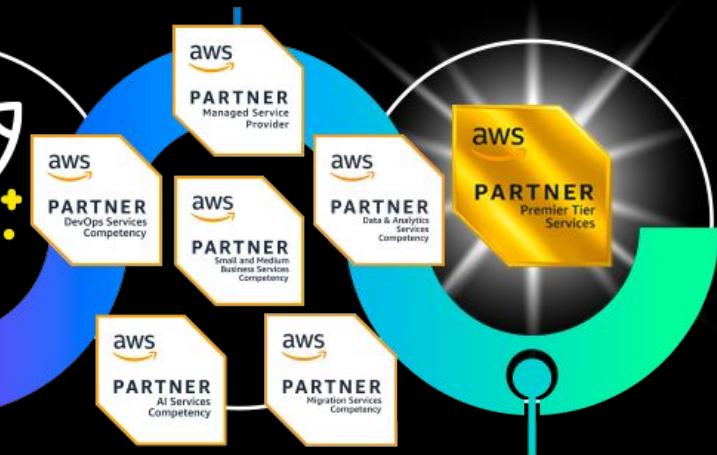

International team with  
+200 collaborators

Partners of leading  
business-oriented **technology solutions**.

**AWS Rising Star**  
**Partner** 2021 & 2022

We hold **Migration, DevOps, Managed Services, Data & Analytics, GenAI, and SMB Services** (2026) competencies—**first** in Mexico for Data & Analytics and GenAI.

**2025: First Mexican**  
**Premier Partner**

# OUR SERVICES

## IoT (Internet of Things)

Optimize your day-to-day operations with data about your assets.

## Journey to Cloud

We manage the complete migration of your systems to the cloud, ensuring a smooth and efficient transition.

## Data Governance

It is key to organize data and define the necessary volume for accurate decisions. We assist you in optimizing Data Governance.

## AI & Data Science

We boost your business with AI and Data Science solutions, turning data into strategic decisions to accelerate growth and innovation.

## Customer Experience

We develop solutions that simplify your team's work and improve integration with external clients.

## Data Analytics

We elevate your company by modernizing and unifying data management to transform it into strategic assets.

## Managed Services

We guarantee that your business's infrastructure and essential processes are operational whenever you need them.

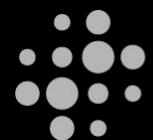

# PARTNERS IN SUCCESS

We are allies of our clients on the path to digital transformation. We focus on generating, consolidating, and analyzing data for better decision-making, delivering value to our partners regardless of industry.

# ALLIANCES

We believe our **strategic alliances** are key to driving innovation and delivering value to our clients. Through them, we expand the reach of our solutions, integrate the best technologies, and strengthen a solid ecosystem that ensures successful projects with a real impact on digital transformation.

# SOME OF OUR SUCCESS STORIES

## Innovating at Sealand with Artificial Intelligence

We transformed the aquarium experience with an AI app that enables recognition and information about marine species, enhancing learning and interaction.

## Transformation towards a Data-Oriented Organization for Grupo Aeroméxico

This project focused on a data migration strategy to optimize processes and improve decision-making.

## Revolutionizing Business Intelligence at El Palacio de Hierro

We carried out a comprehensive modernization of the BI system, centralizing data in the cloud to optimize information management and security.

## Revolutionizing Industrial Planning with Digital Innovation

We implemented a customized IoT solution, transforming global production management with real-time monitoring and advanced analysis to streamline decisions and optimize costs.
